TMS FOR FREIGHT BROKERS

Run freight like a pro, not like a spreadsheet.

Rate confirmations, FMCSA carrier checks and invoices in one place — built for new brokerages that are outgrowing Excel.

1

Rate con in, load out

Upload a signed rate confirmation and OCR pulls the carrier, rate and stops into a new load. No retyping.

2

Vet carriers before you book

FMCSA-backed checks flag expired insurance, inactive authority and unsatisfactory safety ratings before a carrier is assigned.

3

See your margin on every load

Shipper rate, carrier pay and margin side by side, with invoices and carrier settlements built from delivered loads.

WHAT'S INSIDE

Everything a growing brokerage needs

- Kanban board or table view for dispatching and updating loads
- Broker, Dispatch or Hybrid mode — screens adapt to how you work
- Live tracking link for customers — no app, no login
- Load requests from your own mailbox arrive as drafts
- PDF rate confirmations, unlimited loads on every plan
- Lane and margin history, invoicing, DAT/Truckstop setup — Growth
- QuickBooks Online, factoring, MacroPoint tracking — Scale

We move your spreadsheet in for you — free.

Send us your current load sheet and we import it, so you start with your real lanes, carriers and customers on day one.

7-day free trial · no credit card

Try it with a load or two on your own time. Cancel anytime.
